### **DURATION**

While we usually finish our work within one day, we may make several visits to the site over a period of days, weeks or months depending on the nature of the project.

### **MARKERS**

We may use stakes, flagging, paint or other methods to mark monuments. These monuments could be existing markers, temporary markers or new markers we set as part of the survey. If you have any questions as to monuments we've flagged, feel free to contact us.

### **REQUEST FOR INFORMATION**

Local land owners are often our best source for information regarding the evidence and history of the boundaries. If you are aware of maps, monuments, markers, references or other indications of the boundaries, or the history of how the boundary was established, changed or agreed to, please contact us with this information.

### **AVAILABILITY OF SURVEY**

Depending on the nature of this survey and applicable laws, we may or may not record a survey with the County. If we do record a survey, this is a public document. You can obtain a copy from the County or from us. If we don't record a survey, we provide documentation of the survey to our client. We may be able to provide a copy with permission from our client. Feel free to contact us if you have questions about the availability of the final documents.
